

ARE YOUR FAQs ACTUALLY HELPING USERS?

WHAT IS FAQ?

A FAQ (Frequently Asked Questions) is a list of common user questions about a product or service.

But many FAQs fail because they are hard to scan and not structured around user needs.

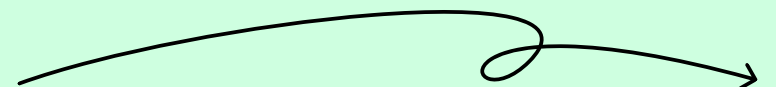

A BETTER APPROACH (INSPIRED BY TECHSCRIBE)

Instead of listing questions randomly:

- Group them by user intent
- Add clear categories
- Make content easier to scan

I APPLIED THIS
APPROACH TO A
SAMPLE:
**GMAIL
TROUBLESHOOTING
GUIDE**

✗ Traditional FAQ

1. Why can't I sign in to my Gmail account?
2. What should I do if I forgot my Gmail password?
3. Why can't I send attachments in Gmail?

✓ Structured FAQ

1. **Account Access:** Why can't I sign in to my Gmail account?
 2. **Password Recovery:** What should I do if I forgot my Gmail password?
 3. **Sending Emails:** Why can't I send attachments in Gmail?
- 

Why this works:

- Easier to scan
- Faster problem-solving
- Matches how users think
